COMPETENCY JOB PROFILE

Laura Araujo Simoni

System Analyst | 15 years of experience

PERSONAL STATEMENT

I believe that developing software is an incredible way to help people, making their lives more agile and practical, while keeping an active mind and knowledge in constant renewal. I see the process of finding solutions to the difficulties, transforming them into software and continually improving it as one of the most fascinating things in the area of technology. I realized this when, working at Empresa Brasil de Comunicação (EBC), we developed a platform where employees could check their time sheet on a daily basis. The result of this transparency in the information was a drastic reduction of the conflicts between employees and company.

I believe in continuing education, so I constantly invest in studies and updates. I just participated in the SheCodes initiative, organized by Matt Delac, where I spent a weekend learning and sharing knowledge with other women interested in the programming career. I finished this workshop with the certainty that diversity in the work and research fields, especially of technology, brings benefits to all. I'm also convinced that technology blends into all areas of life. Considering that I have been studying music and singing for some years, I see how these blended skills allowed me to reach out to people and touch them in some way.

MOST IMPORTANT PROJECTS

ERP Protheus Deployment | PO/ Business Analyst

FEB/2016 – NOV/2018

Project focused on adherence and deployment of Protheus ERP, developed by TOTVS S/A. The main goal was to connect all areas of the company such as fiscal, human resources, payments and legal department through one software. I managed the project, dealt with legacy data to be imported. Had to manage conflicts and decide whether the modules were considered delivered or not. (Oracle, PL/SQL, Linux and Windows 2012 Server, Git)

CLIENT EBC - Empresa Brasil de Comunicação

Publicidade Legal | Business Analyst

JUL/2015 – FEB/2016

Project for development of an application that would allow other organs of the federal government to divulge documents so that the population had access. My job included interviewing users, creating documents (stories), prioritizing backlog events, and leading meetings with devel team and in the end, training the users and the level 1 help desk.

(Scrum, UML, Trello, MediaWiki, office tools, Linux, Git)

CLIENT EBC – Empresa Brasil de Comunicação

E-Learning DIGISA | Jr PHP Developer

OCT/2012 – FEB/2013

Maintenance of web e-learning platform and sites for online version of several magazines for Escala publishers.

(PHP, Sql Server 2008, HTML, CSS, JavaScript)

CLIENT DIGISA Tecnologia

Soft Pegasus ERP / Soft Cosmos | Deployment Analyst

OCT/2006 – OCT/2012

Deployment Analyst of the softwares designed by the company to serve wholesale and retail business. I imported data from legacy systems, developed sql reports and BI reports based on Stored procedures based on what the client needed.

(SQL, Linux server, Windows Terminal Server, TeamViewer, VNC)

CLIENT Softsystem Engenharia em Software
